

This list covers trucks that are appropriate for Westerfield Kits. We have listed both metal and plastic trucks as modern plastic trucks have much more detail. If you use plastic trucks, you may need to add weight to your Kit.

This list is also available in a PDF on our Website, Main Page, left side, under WEST KIT TRUCK USE LIST.

All Tahoe and Kadee trucks (and Kadee Couplers) are available on our Website. Secure Model Store. Use the section ADD-ON to see the Tahoe and Kadee trucks that can be added to a Kit order.

**Please note that Kadee products must be ordered with a Kit and are not available alone.** Kadee trucks are listed with Code 88 wheels. They are also available with Code 110 (RP-25) wheels. NOTE: KD #517 does not have a Code 88 truck version.

Tahoe trucks may be ordered with a Kit or alone. We also have a Tahoe discount for larger quantities of Tahoe trucks ordered.

Tahoe trucks are listed with Semi-Scale Code 88 Wheels (-2XX) but are available with Code 110, (-1XX) RP25 wheels or Frame Only (-0XX).

Some truck types are also available from 3D printing firms. Try a Google search for them.

When known, we will also list other type trucks for Kits. Availability of these trucks is unknown.
